

Reefer containers Details Cool---used reefer container for sale

SWWLS's 40ft Cool Room container provides superior onsite temperature controlled storage for temperature sensitive goods. Utilising the proven technology in our larger 41ft, 46ft and 48ft refrigerated containers, the smaller unit provides greater flexibility for limited space, short-term events or those with smaller storage needs.

The Cool Rooms come with F-Tracks to secure freight whilst in transit. This is complimented by internal scuff plates and flush mounted components to reduce damage to the inside of the container. Internal luminescent exit safety stickers ensure the safety of your staff.

The unit can also be used to transport or store up to 16 pallets with the addition of vertical load bars. Available for hire or sale, these cool rooms are a flexible solution for keeping your goods at temperature.

Built with superior temperature control and insulation, temperature is efficiently maintained with reduced machinery run time, reducing electricity use and costs.

SWWLS is a supplier to China's leading logistics companies. Coupled with our +26 years experience, we fully understand the importance of reliable, economical and fail-safe refrigeration.

Our range of refrigerated shipping containers are designed specifically with the end user in mind and offer flexibility in capacity options and sizes to suit your requirements.

How is this container delivered?

		
<p style="text-align: center;">Tilt Tray</p> <p>Tilt tray delivers a container off the back of the truck. Similar to a tow truck, the tray is mechanically lowered at an angle, and the container is slid off, with the truck moving forward at slow speed.</p> <p>This is the most common delivery method used for containers.</p> <p>Tilt trays are not suitable for sites with overhead power lines as the container height increases significantly when tilted.</p>	<p style="text-align: center;">Side Loader</p> <p>Side loaders are used to transport our 40 foot and 40 foot shipping containers.</p> <p>This is the best delivery method for containers at sites that have limited space either in front or behind the area where the container is to be positioned.</p> <p>The container is unloaded between the two outrigger feet of the side loader, approximately half a metre from the side of the truck.</p>	<p style="text-align: center;">Hiab Crane Hiab</p> <p>Hiab cranes lift containers from a mechanism located behind the truck's cabin.</p> <p>This is used when there is limited space for a side loader or tilt tray.</p> <p>Using a crane means the container is easily positioned at an angle or up on a raised area.</p> <p>It can also be used to place containers over a fence or other obstacles.</p>

Refrigerated containers are used for goods which need to be transported at a constant temperature above or below freezing point. These goods are divided into chilled goods and frozen goods, depending on the specified transport temperature. They principally include fruit, vegetables, meat and dairy products, such as butter and cheese.

High-cube integral units are used in particular for voluminous and light goods (e.g. fruit, flowers).

Nowadays, goods requiring refrigeration are mostly transported in integral units, which have a markedly higher market share than porthole containers.

Chilled meat is sometimes also transported hanging, for which purpose the ceilings of refrigerated containers are equipped with special hook rails

When shipping temperature-controlled goods, it's crucial to have a reliable logistics partner who can ensure seamless cold chain transportation from the source to the destination.

Whether you're transporting fresh fruits, frozen meat and seafood, or pharmaceuticals, our solution can be customized to provide the precise level of service you require.

With access to all major reefer carriers, we guarantee that your shipments will arrive on time and in perfect condition. For the transportation of perishable goods, including fish, meat, dairy, fruits, and vegetables, we offer a dedicated solution through [SWWLS Logistics Company](#).

We understand that your needs extend beyond port delivery, which is why we provide a complete cold chain end-to-end solution. Our full-spectrum solution allows you to delegate your logistics needs to us, allowing you to focus on serving your customers.
